SSE.1/Circ.2/Rev.2  
25 September 2019

## HALON BANKING AND RECEPTION FACILITIES

1 With the adoption of the 1992 and 2000 amendments to the 1974 SOLAS Convention (resolutions MSC.27(61) and MSC.99(73)), new installations of halon fire-extinguishing systems were prohibited. However, halons need not be withdrawn from existing fire-extinguishing systems.

2 Noting that it would be useful to have information on the availability of halon banking and reception facilities at various ports around the world to recharge or decommission existing fire-extinguishing systems, it was decided by the Sub-Committee on Fire Protection (FP) to disseminate information on the availability of such facilities. Member Governments were requested (FP/Circ.1) to advise the Secretariat of any national halon banking and reception facilities established under their jurisdiction, together with their address, telephone numbers and email addresses to enable contacts for the purpose of arranging the deposit of decommissioned halons or the purchase of recycled ones.

3 Referring to the restructuring of the IMO Sub-Committees which took effect on 1 January 2014, the Sub-Committee on Ship Systems and Equipment (SSE), at its first session (10 to 14 March 2014), having considered whether the annual issue of FP.1 circulars should be continued as SSE circulars, instructed the Secretariat to issue all future circulars as SSE.1 circulars and update them only as and when necessary, in lieu of issuing them annually, i.e. as revisions to the base circulars.

4 Furthermore, following the decision of the SSE Sub-Committee, a new module on halon banking and reception facilities has been established under the Global Integrated Shipping Information System (GISIS) in order to facilitate the dissemination of the information among interested parties.

5 This circular contains the revised list of halon banking and reception facilities, based on the information received by the Secretariat up to September 2019. In line with the Sub-Committee's decision, this circular will no longer be reissued, as Member States are expected to update relevant information directly in the new GISIS module.

6 Instructions on how to use the new module is contained on the homepage of the GISIS module on "Test Laboratories and Halon Facilities". Member States are requested to bring the information contained in this circular to the attention of shipyards, equipment manufacturers, shipowners, ship operators and other parties concerned.

7 This circular supersedes the *Halon banking and reception facilities* (SSE.1/Circ.2/Rev.1).

<b>Argentina</b>	Instituto Nacional de Tecnologia Industrial (INTI) Av. Gral.Paz e/Albarellos y Constituyentes B1650WAB San Martin, Buenos Aires, Argentina Tel: (+54 11) 4724-6200/6300/6400 Website: <a href="http://www.inti.gov.ar">www.inti.gov.ar</a> Email: <a href="mailto:cecon@inti.gov.ar">cecon@inti.gov.ar</a> Ing. Ana Maria Di Pace	Procedures: 1 Users of halon 1301 installations should contact INTI. 2 The INTI offers advice and information on authorized operators. 3 The INTI analyses halon 1301 for withdrawal and recommends a destination for reception of halon 1301. 4 Users should contact an authorized operator for the withdrawal of halon 1301. 5 In the case of conversion of the entire system, INTI provides a certificate to the user once the original system is withdrawn.
<b>Australia</b>	Australian National Halon Bank Laverton North, Victoria, Australia Contact: Ms. Elvira Nigido D: (+61) (0) 3 92404304 F: (+61) (0) 3 93689233 M: (+61) 413 272 275 <a href="mailto:NationalHalonBank@environment.gov.au">NationalHalonBank@environment.gov.au</a>	The National Halon Bank may supply halon to a foreign flag ship on request to service existing systems. The supply of halon will be subject to approval from the Department of the Environment and Energy, and decided on a case-by-case basis. The Australian National Halon Bank manager will seek approvals on behalf of the foreign flag ship prior to supply.  The Australian National Halon Bank can also safely dispose of contaminated halon, or halon removed from decommissioned fire protection systems.
